

## AIM-PROGRESS and SAI Platform

Both are organizations working on **promoting sustainability in supply chains.**

With **many common members** in the **food and drink sector**,  
the two organizations are working to:

**Articulate  
complementary activities**

**Drive  
effective collaboration**

**Leverage  
mutual learning opportunities**

**AIM-PROGRESS promotes responsible sourcing. SAI Platform promotes sustainable agriculture practices, which is part of responsible sourcing.**

The **two organizations** have **unique and complementary focus areas:**

Where **AIM-PROGRESS'** strength is related to good responsible sourcing practices in the FMCG supply chain **up to farms**, from processor to manufacturer ...

... **SAI Platform** aims at improving sustainable agriculture **at farm level** through good agricultural practices (Principles & Practices, FSA).

Building on this, **AIM-PROGRESS members** consider SAI Platform as the **'go-to' place for best practices, approaches and processes in sourcing of agricultural raw materials**, focusing on farm-level.

**SAI Platform members** consider AIM-PROGRESS as the **'go-to' place for the broader responsible sourcing work.**

See AIM-PROGRESS' [website](#)

See [SAI Platform's Tools & Guidance](#).

Recognizing their **mutually reinforcing roles in furthering responsible/sustainable sourcing**, the two organizations will **continue to collaborate closely** to demonstrate both **leadership** and **effective action in common areas** - bringing together both ends of common agricultural supply chains, through the following specific activities:

Capacity building,  
resource and  
tools development

Driving alignment between existing systems,  
such as ITC and SEDEX,  
to manage and standardize common data

Please do not hesitate to contact us for any further information or questions.

**AIM-PROGRESS**  
[www.aim-progress.com](http://www.aim-progress.com)

“Positively impacting people’s lives through our combined leadership of robust responsible sourcing practices throughout our supply chains”.

**SAI Platform**  
[www.saiplatform.org](http://www.saiplatform.org)

“Implement secure and thriving agricultural supply chains and protect the earth's resources through widespread adoption of sustainable practices that deliver value to our members, farmers, farming communities, and consumers.”
