

The logo for the Sustainable Agriculture Initiative (SAI) Platform. It features the letters 'SAI' in a large, bold, white sans-serif font, positioned above the word 'PLATFORM' in a smaller, bold, white sans-serif font. Both are enclosed within a white rounded rectangular border. The background is a blurred field of golden wheat under a warm, sunset sky, with a diagonal green and orange gradient overlay.

SAI

PLATFORM

**SUSTAINABLE
AGRICULTURE
INITIATIVE**

**developing
sustainable agriculture
solutions through
member-driven
pre-competitive
collaboration**

SAI Platform is a global food and drink industry platform for developing sustainable agriculture solutions through member-driven pre-competitive collaboration.

SAI Platform works with its members and external stakeholders to catalyse change and establish sustainable agriculture as a pre-requisite for doing business throughout the food and drink industry supply chain.

A PRE-COMPETITIVE, COLLABORATIVE & MEMBER-DRIVEN PLATFORM

SAI Platform collaboratively builds agricultural sustainability solutions to

- >> cross-cutting challenges
- >> commodity, region and value chain-specific issues

Being part of SAI Platform means being at the cutting edge of **innovation, emerging issues, and opportunities** relating to sustainable agriculture.

SAI Platform **connects**

- >> the most knowledgeable and experienced professionals and stakeholders in the field with
- >> engaged members from the **worldwide value chains** of the food and drink industry – **from farmer cooperatives to retailers.**

SAI Platform works with NGOs, non-profit organisations, universities and research bodies to develop **simple and harmonised**

- >> sourcing and implementation best practice
- >> sustainability assessment and impact measurement tools

BUILDING SOLUTIONS TOGETHER

SAI Platform works with its members through its Working Groups and Committees to **address specific challenges** in implementing and improving sustainable agricultural practices in their value chains.

Working Groups and Committees **work with external stakeholders** to

- establish best practice
- harmonise industry standards
- develop implementation solutions, guides and resources

PILOT PROJECTS

SAI Platform builds partnerships and collaborates with members on **implementation projects to pilot new ways of farming sustainably.**

Projects can combine several focus areas, as with SAIRISI, our Italian rice farming project, which addresses the challenges of transferring knowledge from researchers to farmers, water management, GHG emissions, and working with a long supply chain.

FARM SUSTAINABILITY ASSESSMENT

The FSA Programme facilitates the uptake of industry-shared management practices that **improve farm performance and sustainability outcomes.**

It improves the sustainability performance of farmers, reduces the need for multiple assessments and gives access to new buyers. It also increases the ability of companies to meet ambitious sustainable sourcing targets and contribute to positive sustainability outcomes on the ground.

JOIN US

Members shape SAI Platform's agenda through its Working Groups and Committees, which are created in response to members' needs and focus areas, and provide the opportunity for on-going collaboration.

FULL MEMBERSHIP*

Food and drink industry organisations of all sizes, from all levels of the value chain, and at all stages of their sustainability journey. These organisations recognise that **developing their sustainability strategy is key to improving their environmental, social and economic impact.**

Full members participate in the Working Groups, Committees, and projects, and elect SAI Platform's governing body, the Executive Committee.

AFFILIATE MEMBERSHIP

Agricultural stakeholders: organisations such as associations, research bodies, state agencies or commercial organisations who have no direct stake in trading agricultural raw materials but who do have an interest in the work of SAI Platform.

Affiliate members participate in the Working Groups, Committees and projects.
